Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Monica is interested in finding a treasure but the key to opening is to get the sum of the main diagonal elements and secondary diagonal elements.

Write a program to help Monica find the diagonal sum of a square 2D array.

Note: The main diagonal of the array consists of the elements traversing from the top-left corner to the bottom-right corner. The secondary diagonal includes elements from the top-right corner to the bottom-left corner.

Input Format

The first line of input consists of an integer N, representing the number of rows and columns.

The following N lines consist of N space-separated integers, representing the 2D array elements.

Output Format

The first line of output prints "Sum of the main diagonal: " followed by an integer, representing the sum of the main diagonal.

The second line prints "Sum of the secondary diagonal: " followed by an integer, representing the sum of the secondary diagonal.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3
1 2 3
4 5 6
7 8 9

Output: Sum of the main diagonal: 15
Sum of the secondary diagonal: 15

Answer

```
import java.util.*;

class main{
  public static void main(String[] args)
  {
     Scanner sc= new Scanner(System.in);

     int n;
     n=sc.nextInt();

     int[][] arr= new int[n][n];

     for(int i=0;i<n; i++)
     {
       for(int j=0; j<n; j++)
       {
          arr[i][j]=sc.nextInt();
       }
```

```
        }
        int sum1=0,sum2=0;
        for(int i=0;i<n; i++)
        {
            for(int j=0; j<n; j++)
            {
                if(i==j)
                {
                    sum1=sum1+arr[i][j];
                }

            }

        }
        for(int i=0;i<n; i++)
        {
            for(int j=0; j<n; j++)
            {

                if(j+i==(n-1))
                {
                    sum2+=arr[i][j];
                }
            }

        }
        System.out.printf("Sum of the main diagonal: %d\n",sum1);
        System.out.printf("Sum of the secondary diagonal: %d",sum2);
    }
}
```

Status : Correct **Marks : 10/10**
